

# THE SUMMER SCIENCE SAFARI SUMMER CAMP 2021

The Katy/Tays JH Area Week of:

June 7, 2021

See us at [www.summersciencesafari.com](http://www.summersciencesafari.com)

## ***Where Science and Summer Fun Meet!***

### **Introduction**

It's that time of year again and we've been working hard to prepare a science camp experience that will make your child excited about science. We will explore some new destinations as well as some old favorites. Your student has seen the pictures in the science textbooks, now they can experience the science first hand. Whether it's exploring the ecology of **experiencing the thrill of Sky Diving at I-Fly** or **exploring the Hill Country by Zip-Line**, your child is sure to learn and see many fascinating things—not to mention having a great time.

We believe the middle school/junior high years are a time for exploring and investigation...and having a little fun learning along the way. Young people are developing their dreams for the future at this age. At **Summer Science Safari** we help students envision their futures. We pack as much science and learning into five days as we can, then top it off with lots of fun.

We are excited to welcome back **Nikki Kram** for her fourth year, Nikki has been a teacher in public education for 12 years. She began her career in Cy-Fair ISD teaching 6th and 8th grade science. She has been in Katy ISD for six years, teaching at Mayde Creek JH, Tays JH, and now Stockdick JH. She currently is an instructional coach helping to develop teachers in their love and passion for Science.

**Even though the Camp operates from *Tays Junior High School*, all *current 5<sup>th</sup> through 8<sup>th</sup> grade students in the Greater Katy area are welcome.***

## Itinerary

Due to the "Field Trip" nature of the Camp, minor schedule and activity changes are likely. Check Website, regularly, for updates.

### Day 1

**Rock Climbing, Escape Room, and Scuba....** We will start the day with an old favorite—a **Rock Climbing Lesson**. We're really excited to offer a great way for the kids to "hang" with their friends. Next, we're off to visit an **Escape Room** to test the escape skills of our group. Lastly, it is back to the area for a beginners **Scuba Diving lesson**. No prior experience needed for this day's dive. Certified diving instructors will introduce the kids to the world of scuba diving. Instructors will work with the kids and teach them all the do's and don'ts of scuba diving. Each child will be equipped with the latest dive gear and instruction, then they will spend time diving with a scuba tank in the dive school pool.

### Day 2

This day we will head to **Texas A&M University** for a day of real science. We will begin our day with a tour of the **Texas A&M University Medical School**—one of the newest and most modern in the country. Then we are off to learn about **Nuclear Power** and get an up-close look at a working nuclear reactor. From there we will stop at **TEEX Fire Fighting School and Disaster City**, Disaster city is a mockup of a destroyed town. Crushed buildings, massive car pile ups, train wrecks and crashed airplanes are all used here to teach lifesaving skills. Then, it is on to a **Cold-Physics Presentation** by professors in the **Physics Department in the Stephen Hawking Auditorium**. *Have you ever stuck your hand in Liquid Nitrogen?* It will give you chills! Our last stop is the **Chemistry Department** where the students will be given a great **Chemistry Show**.... Sparks will fly!

### Day 3

Wednesday, we're off to **Schlitterbahn** in San Antonio for an afternoon of breathtaking rides, cool streams, and entertainment. For dinner, we're off to **Willie's Grill and Icehouse in San Antonio**. Later, we will be staying at the **Comfort Suites in New Braunfels** where there will be separate girls' and boys' rooms.

### Day 4

On this day we start the day at **Natural Bridge Caverns** where the students will explore one of the finest show caverns in Texas. Next, it's on to the **Wimberley Zip-Line**. Here trained professionals will take us on a **Zip-line tour over the Texas Hill Country**. Emphasis will be placed on **ecology, safety, and fun**

### Day 5

On our last day we'll be floating and flying...We start our final day with a tour of the **Galveston Bay**, in addition to great views, the students will get to study the ecology of the Bay. Next, we finish our week with a sky diving adventure at **I-Fly** where the students will discover the thrill of this fun sport. **What a week?**

**All of this for only \$699.00 including all travels, tickets and entry fees.**

**Lunches, snacks, gifts, and souvenirs are all the responsibility of the parents and students.**

**This year only, we will be collecting Registration Fees LATER IN THE SPRING FOR ALL until such time as we get final approval from the State to conduct "Traveling Camps" like ours.**

**Register NOW, Pay LATER!**

All participants must be current (exiting) 5th through 8th Grade Students (SY 2020/2021). There is a minimum of 10 and a maximum of 13 participants to fill each session. Additional applicants will be placed on a waiting list. Pick Up and Return will be at Tays Junior High School in Katy.
